RE: Report on Gaming Tax Revenue through October 2008

For Council's review, the attached schedules present the gaming tax revenue activity through October 2008 and prior fiscal years.

The city collected \$13.95 million in gaming tax revenue in the fourth month of the fiscal year, which was 19% less than the prior month of September. The October 2008 collection was a 5.1% decrease from October 2007.

Adjusted gross casino gaming receipts came in at \$111.054 million for the month of October 2008. This represented a 4.65% increase over the prior month and a 6.07% decrease over October of 2007. Chart 2A "Monthly Detroit Gaming Receipts" through a twelve-month moving average trend line shows some growth, approximately 3.0% over the last twelve months, among the combined casino receipts. In comparing the first four months of the current fiscal year to the same time period in the prior fiscal year, receipts are up by 1.36%. The first ten months of the 2008 calendar year show growth in receipts of 3.73% over the first ten months of 2007. This growth happens at the same time that Atlantic City revenue was down 6% for the first nine months of 2008, compared with 2007 and Las Vegas revenue was down 6.7% through the first eight months of 2008 compared with 2007. Las Vegas is projected to have its largest annual decline on record. Why this region would have a positive revenue swing of 10% compared with the two largest gaming markets is very unclear.

There is not a one-to-one relationship between the adjusted gross receipts and the tax revenue collection increases due to two factors. First, there is the fact that MGM and Motor City casinos began paying the city 1% less because of the permanent casinos opening on October 3 and November 29 of 2007. This reduction to the city is part of state Public Act 306 of 2004, when the legislature amended Public Act 69 of 1997,

which was the original casino gaming legislation. P.A. 306 increased the wagering tax by 6% of which 2% went to the City of Detroit. The caveat was that when the permanent casino had been certified by the state gaming board as having operated for 30 consecutive days, 5% of the 6% additional wagering tax would be eliminated, with the remaining 1% allocated to the city where the casino is being operated. Greektown will continue to pay the 6% additional wagering tax – 4% to the state, 2% to the city – until the permanent is open, which is scheduled for January 2009.

Second, the amended development agreement of August 2002 between the city and the casinos, which is separate from the state law, has all casinos, beginning in January 2006, paying an additional 1% over the state law, plus another 1% when the casino reaches \$400 million in gross receipts in a calendar year. For the third year in a row, due to MGM and Motor City reaching \$400 million in the calendar year, gaming tax collections will spike by \$10.5 million between September and December. MGM did reach \$400 million in early September, and should have transferred to the City the initial \$4.37 million of the additional 1% within 10 days as stipulated in the development agreement. It does not appear that the amended casino development agreement included any penalty for late remittance, which MGM unfortunately has taken advantage of the last two years. Fiscal projects that Motor City will also reach \$400 million at some point in November and has consistently remitted the funds to the city within the proper timeframe as outlined in the development agreement. It is not projected that Greektown will reach that threshold.

The 2008-2009 budgeted revenue for gaming fees is \$194.78 million, a 0.8% increase over the 2007-2008 budget of \$193.25 million. Based on our regular monthly projections, the current analysis projects a deficit of \$12.0 million for this fiscal year. As it is early in the fiscal year, there may still be additional factors that may shift actual collections.
